ABOUT THIS CD

This disk contains 2 folders named ‘buddy-nest’ and ‘packages’ and a ‘Manual’ which you are currently reading.

The folder ‘buddy-nest’ contains the source code files of the project.

The folder ‘packages’ contains tools necessary to run the project which you have to install if don’t have pre-installed on your computer.

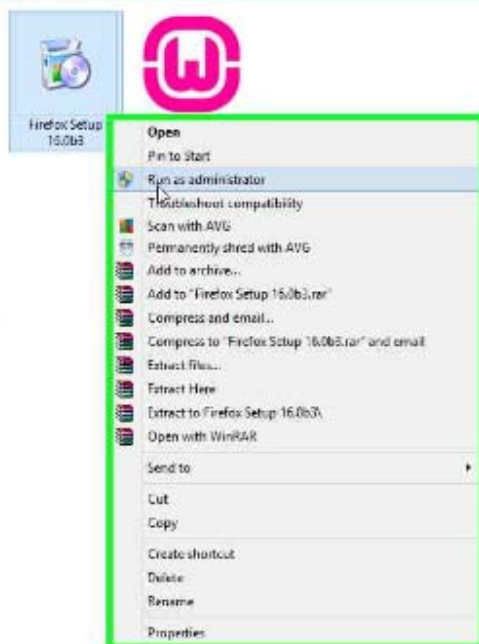

INSTALLING COMPONENTS

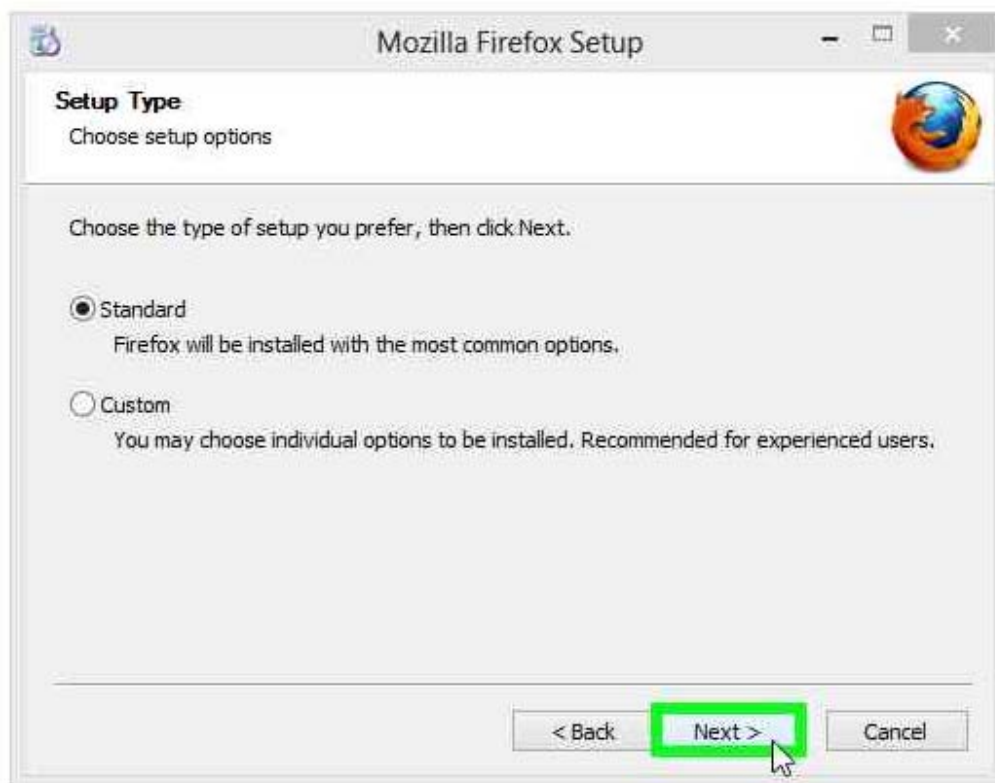

INSTALLING MOZILLA FIREFOX

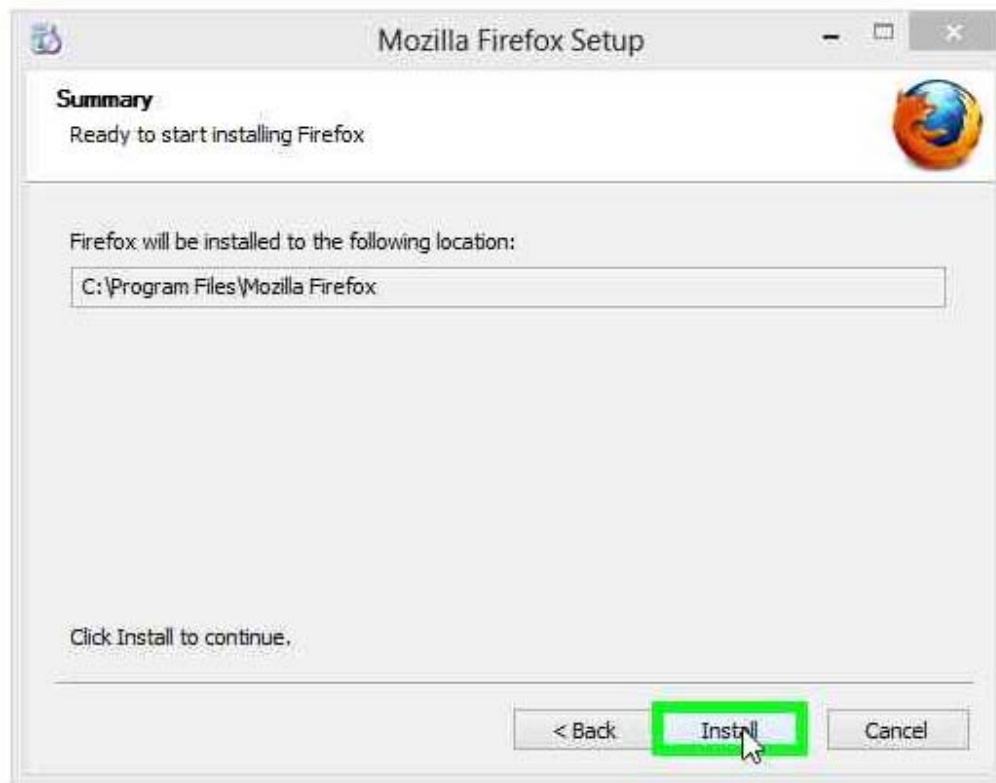

- Open the folder 'packages' from the disk.

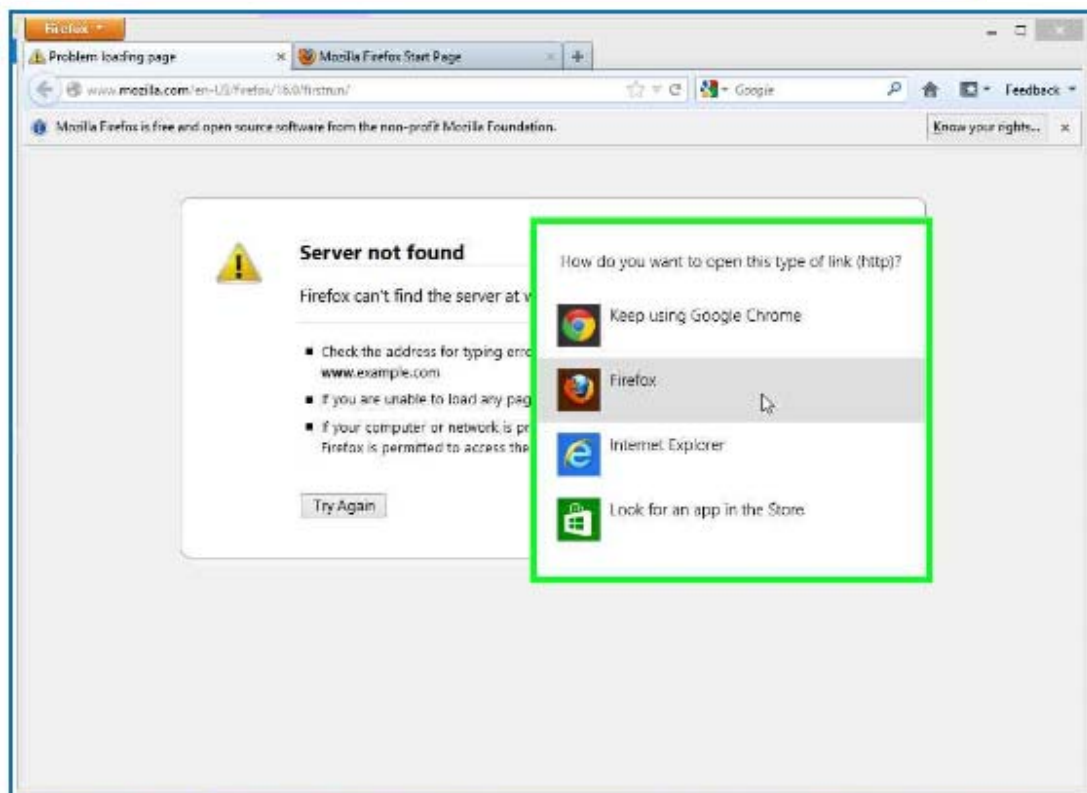

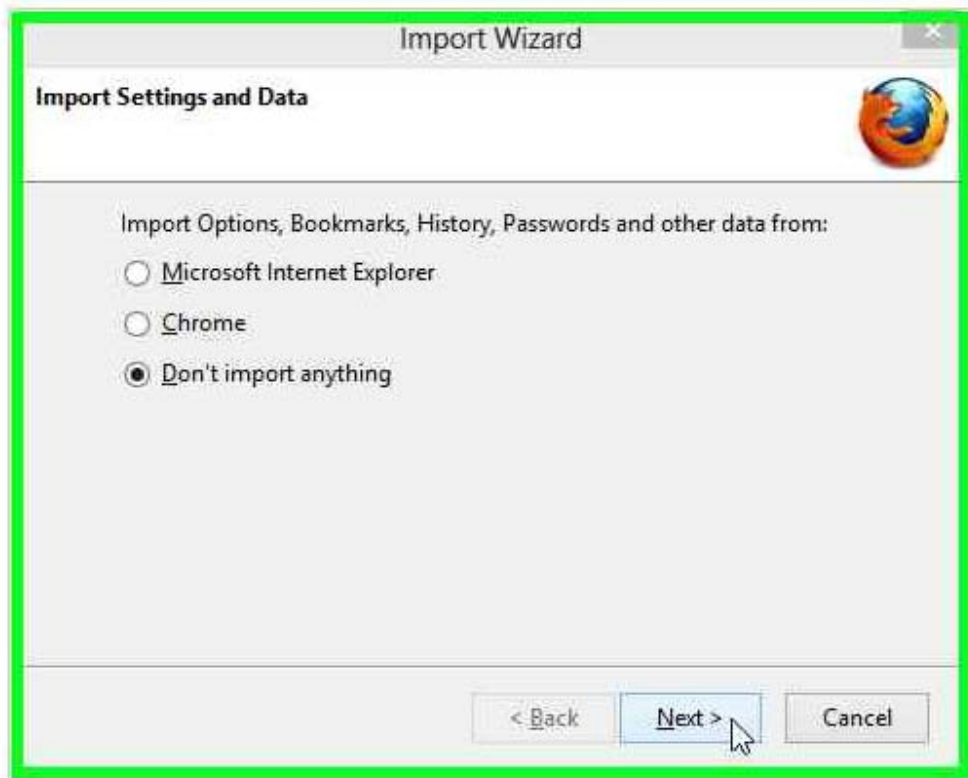

- Open the Firefox Setup and run it with administrator permissions

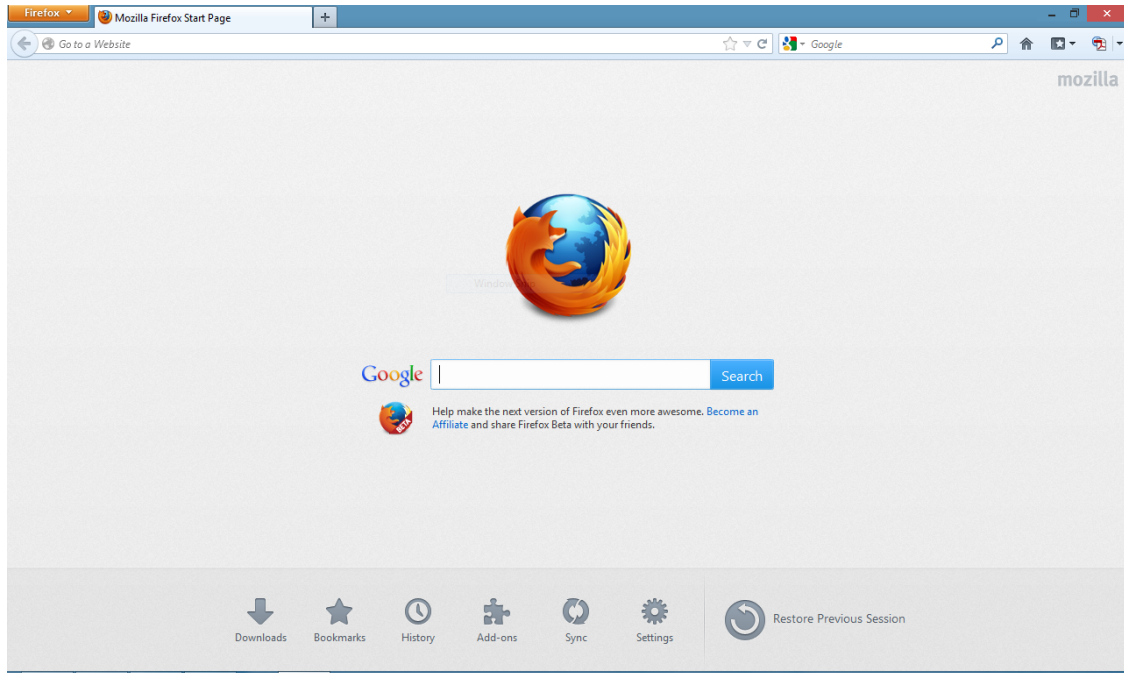

- Now follow the instructions in the setup to install Firefox.

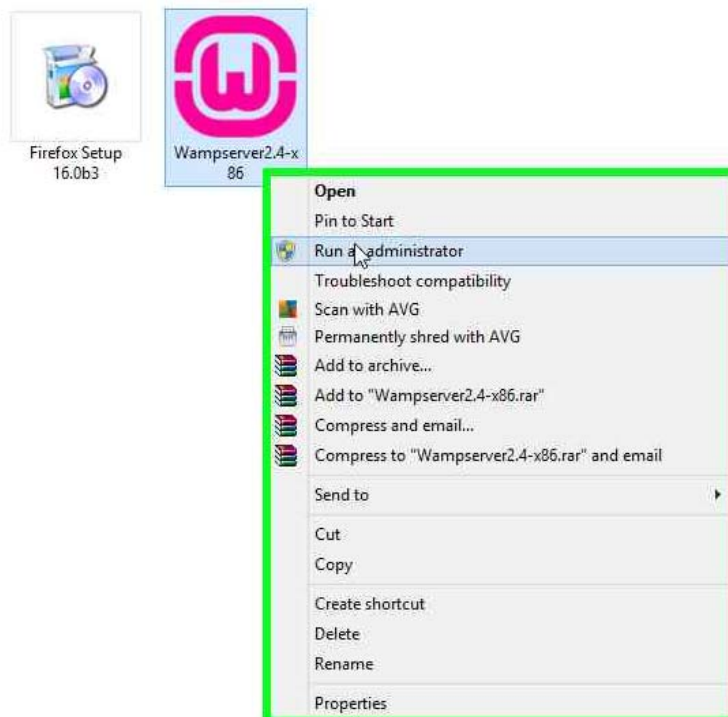

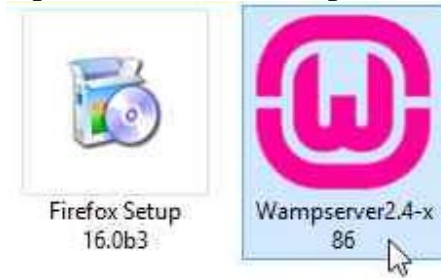

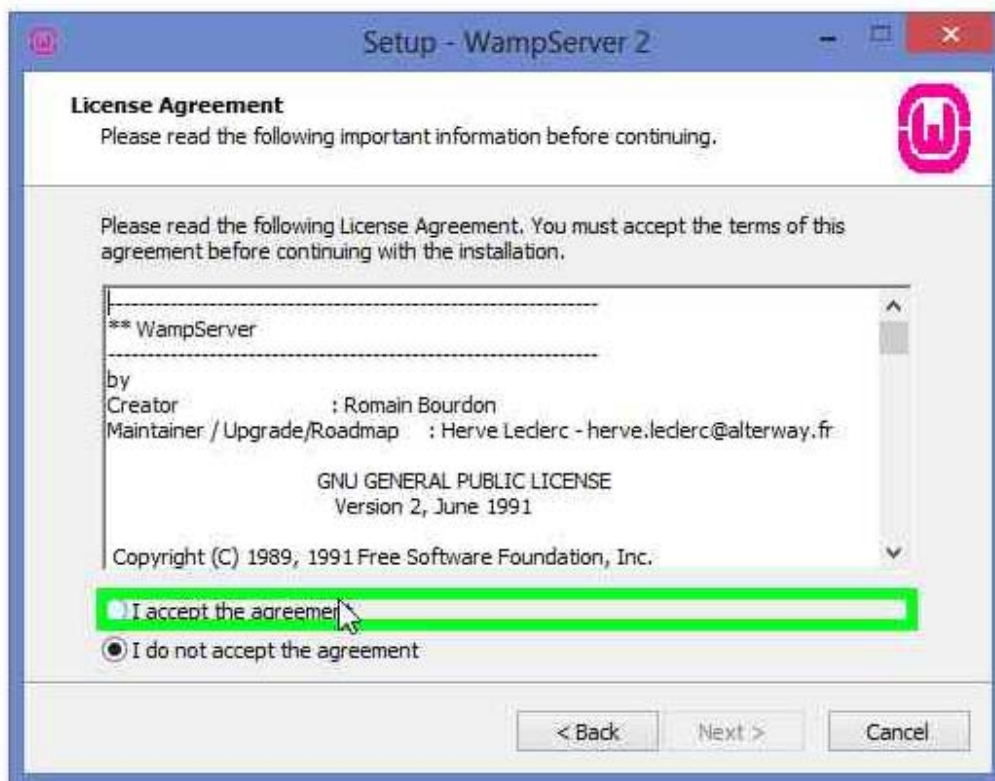

➤ Now the Firefox has been installed successfully.

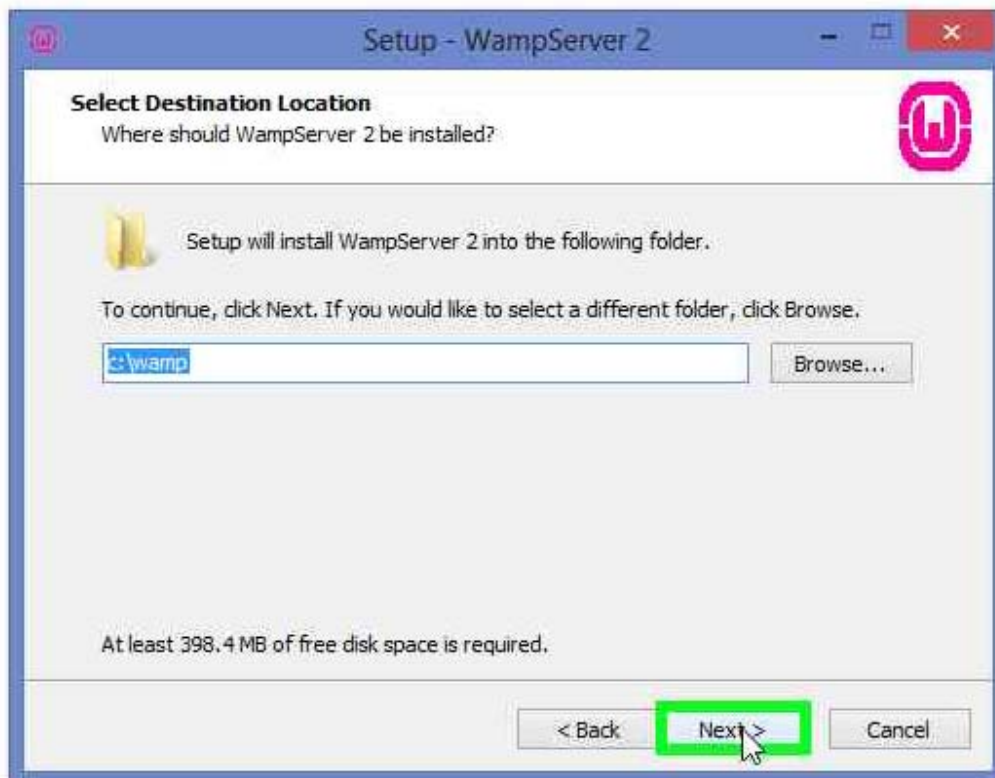

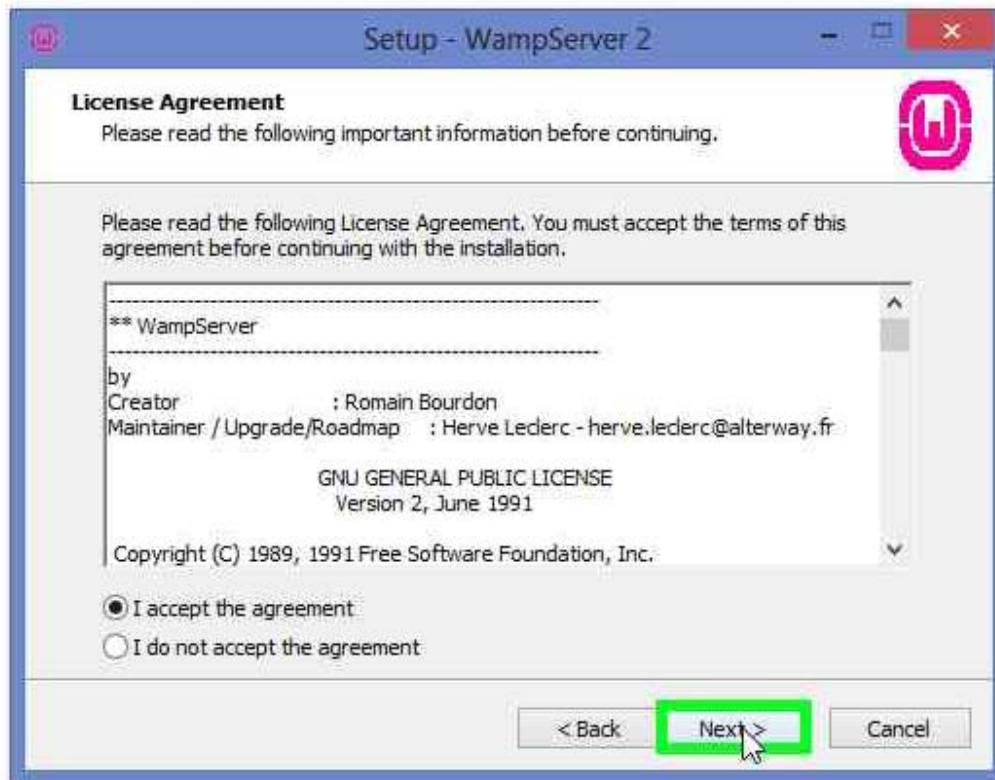

INSTALLING WAMP SERVER

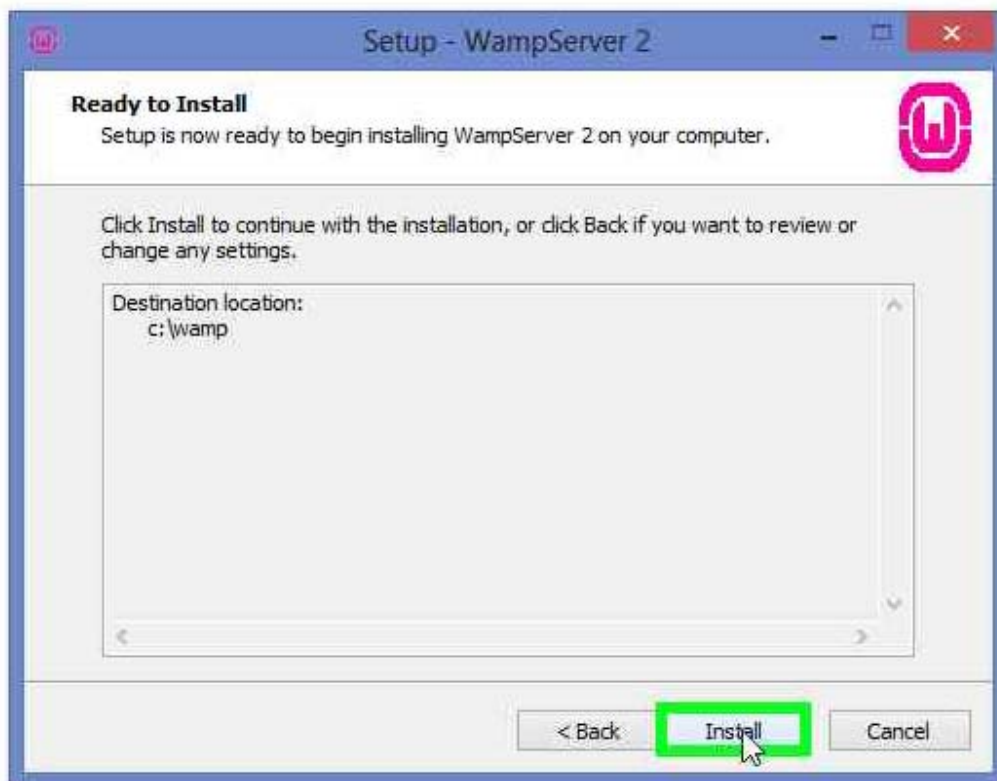

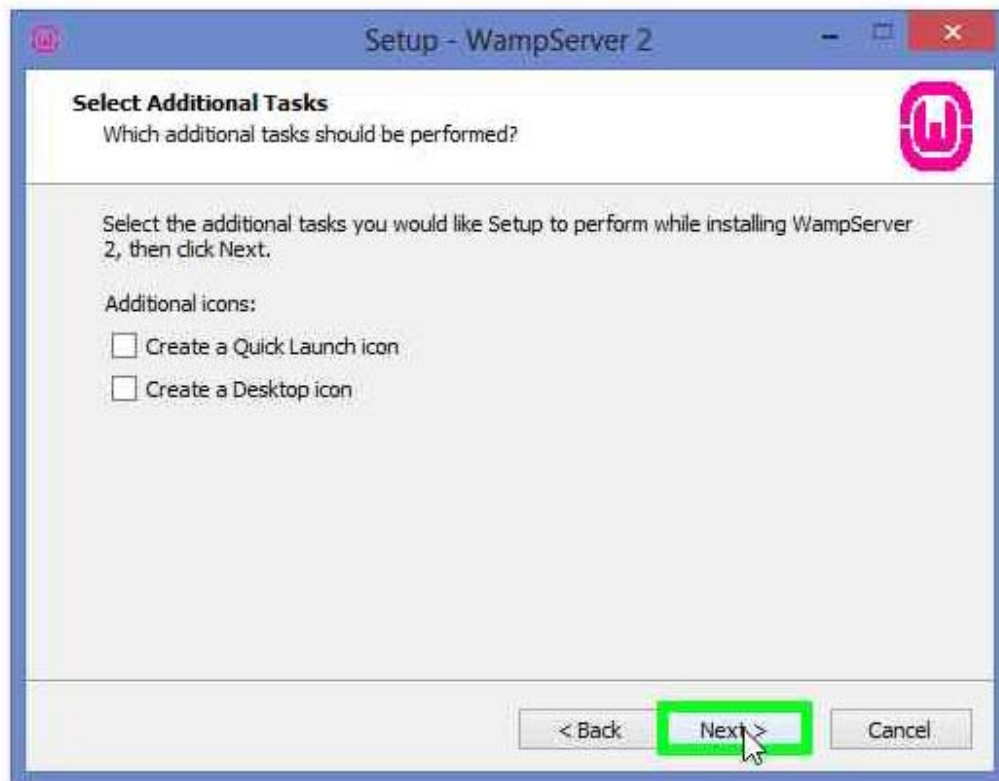

- Open the WAMP setup with administrator privileges.

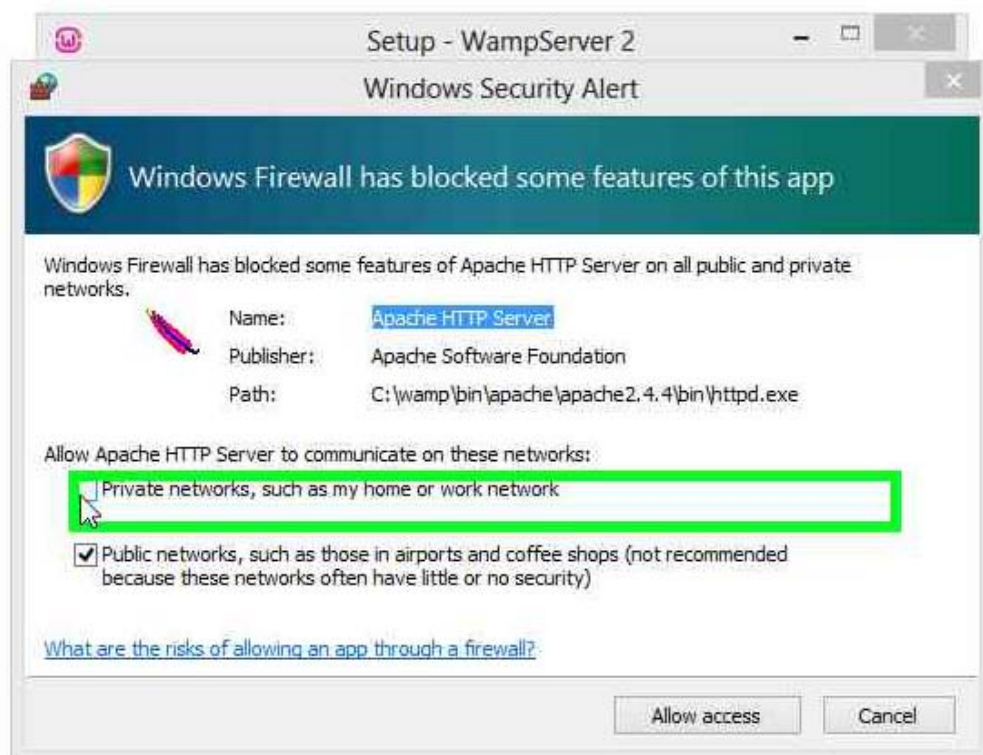

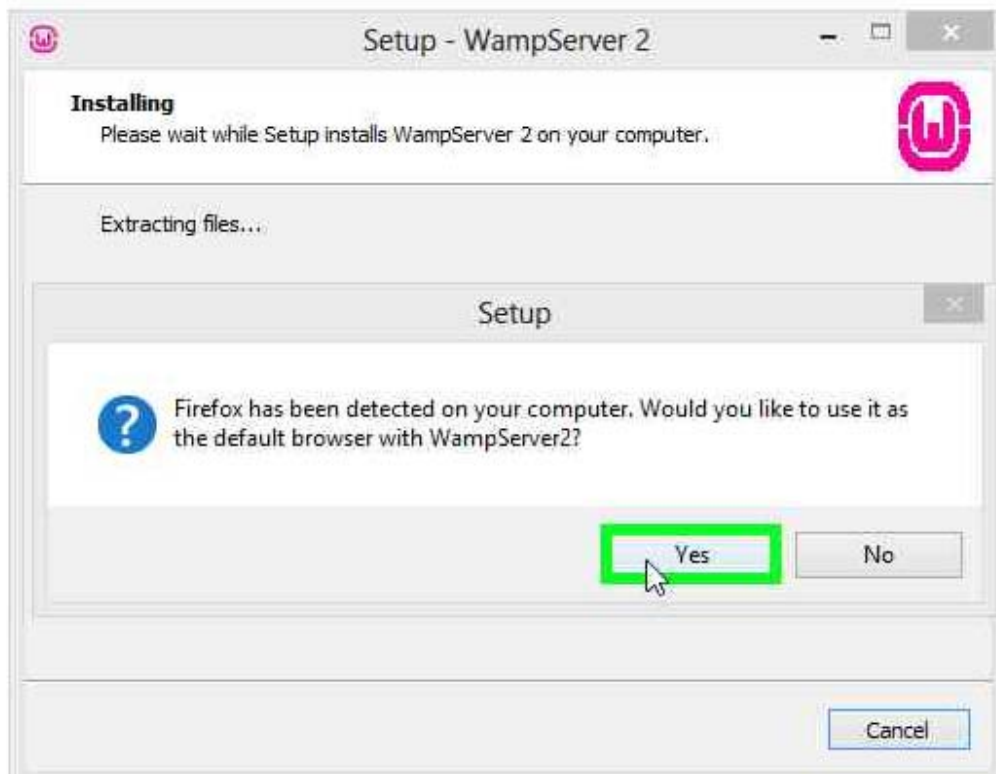

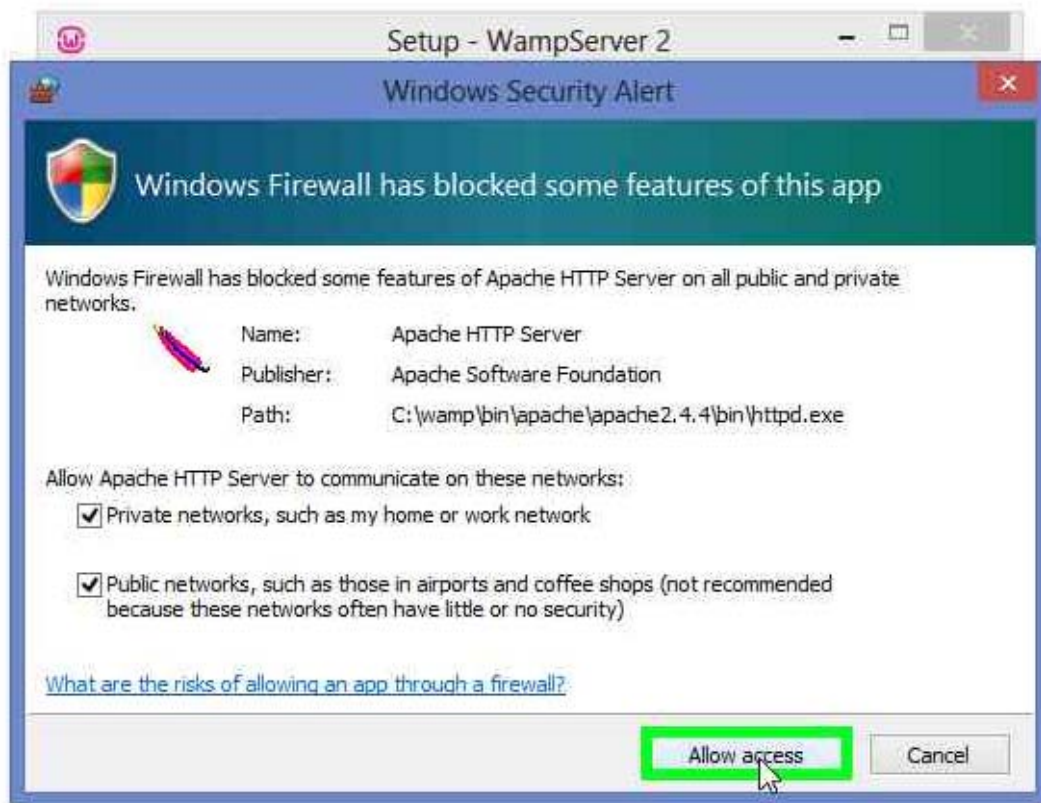

- Now follow the instructions in the WAMP server setup.

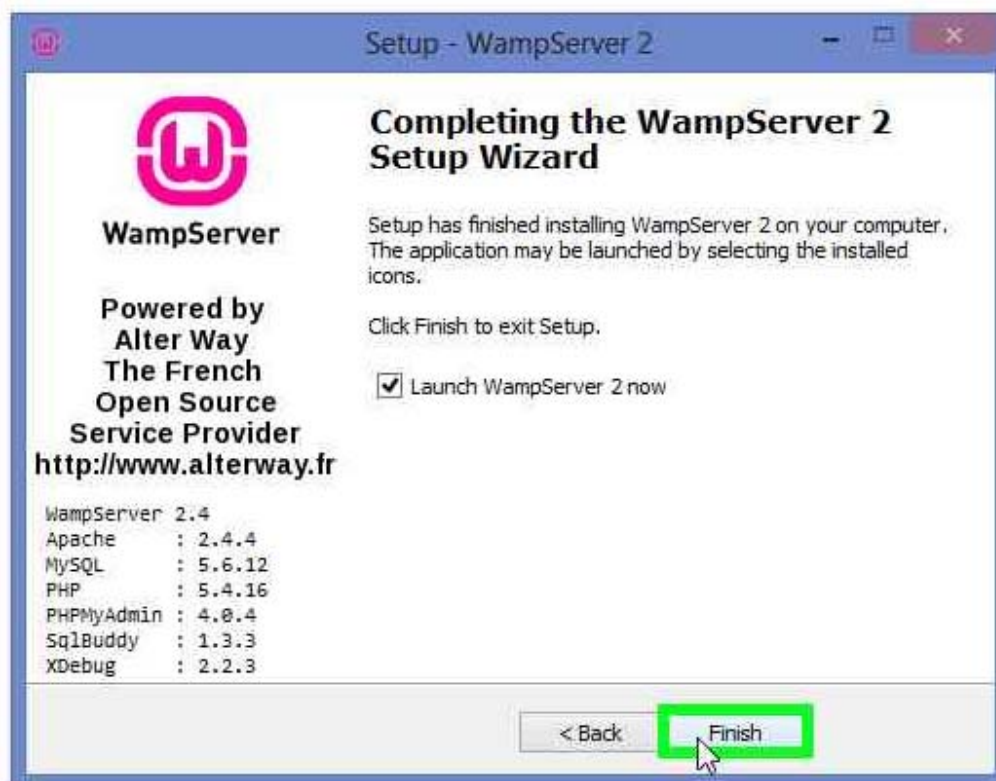

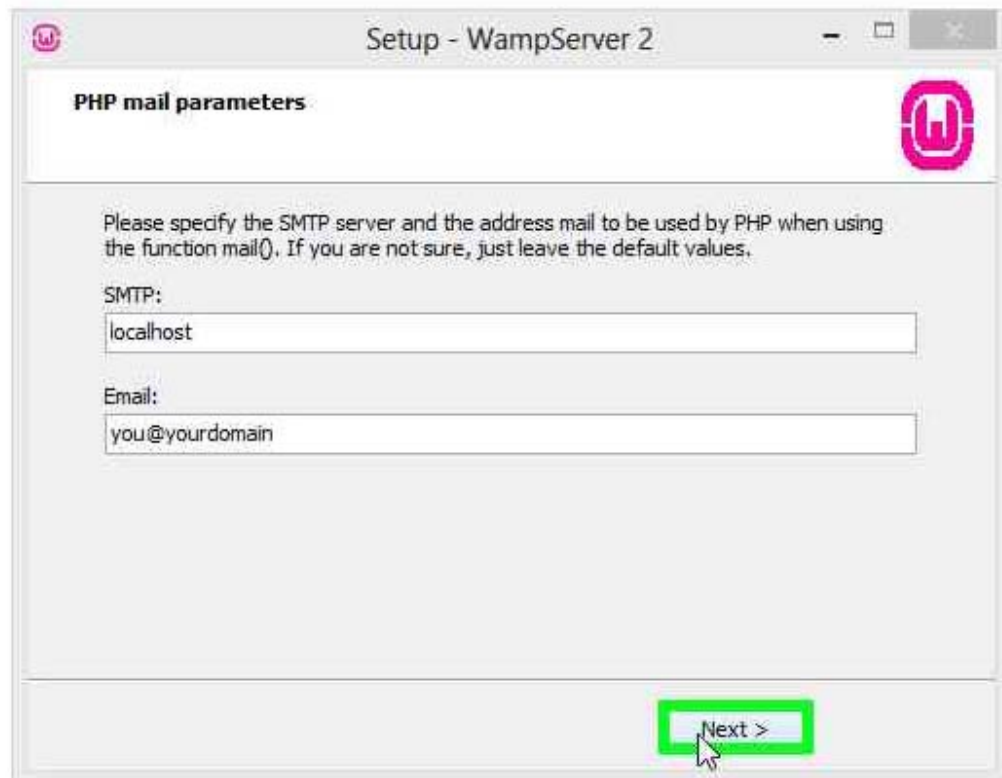

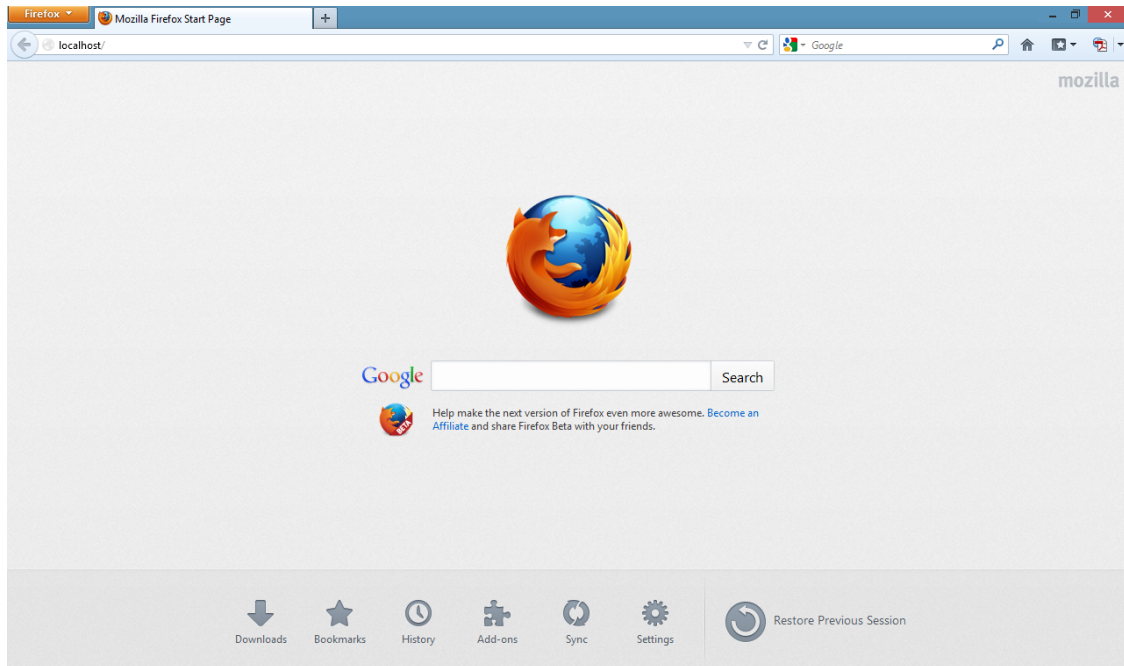

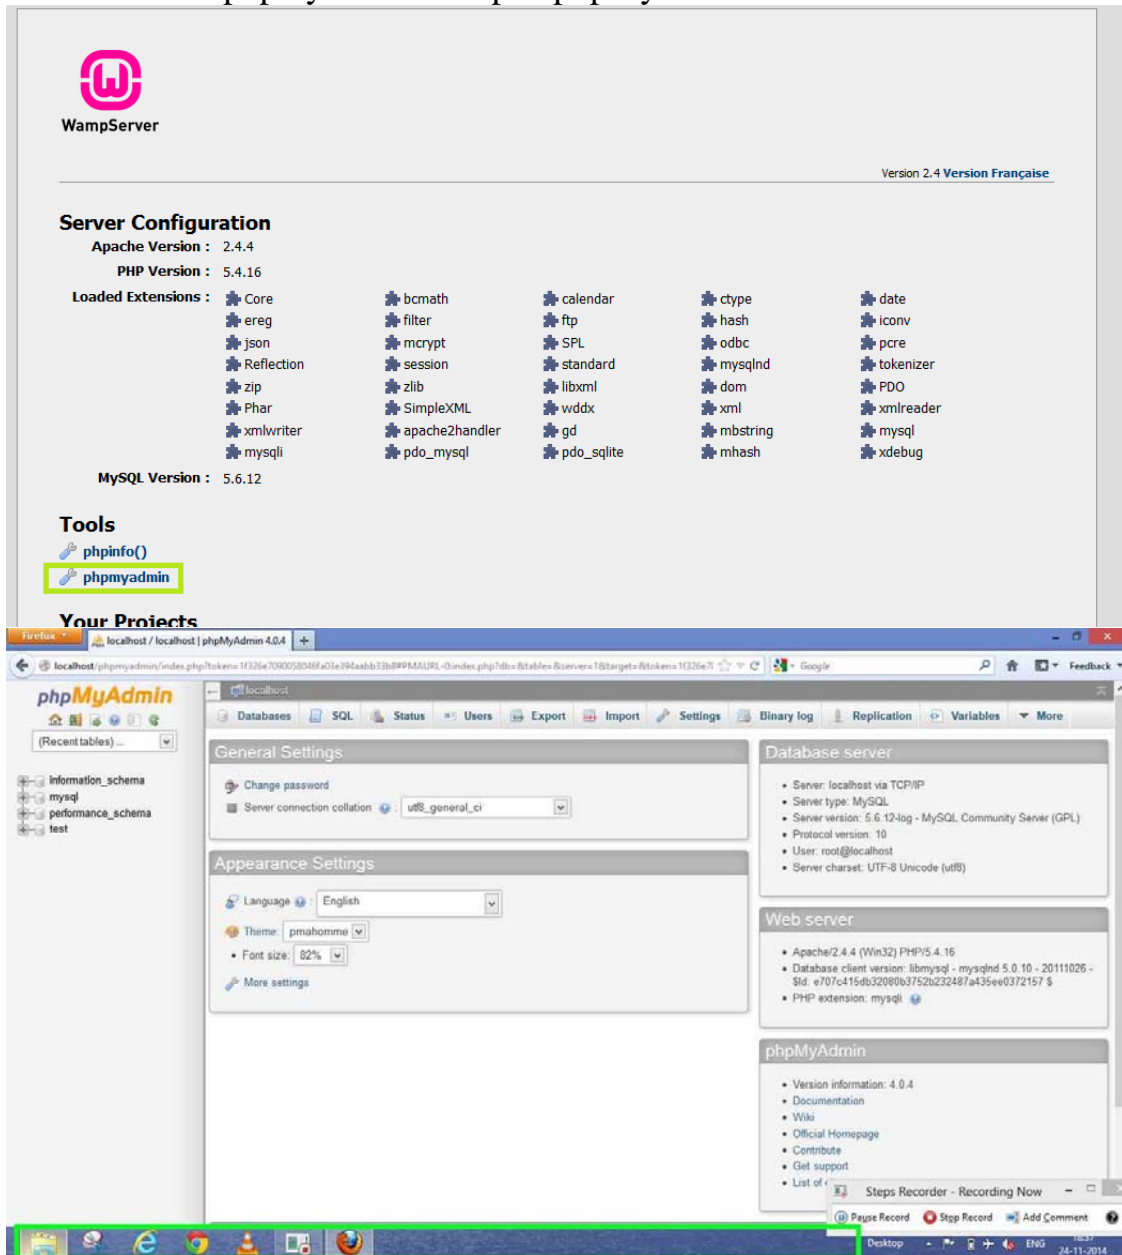

CONFIGURING WAMP SERVER

SETTING PASSWORD

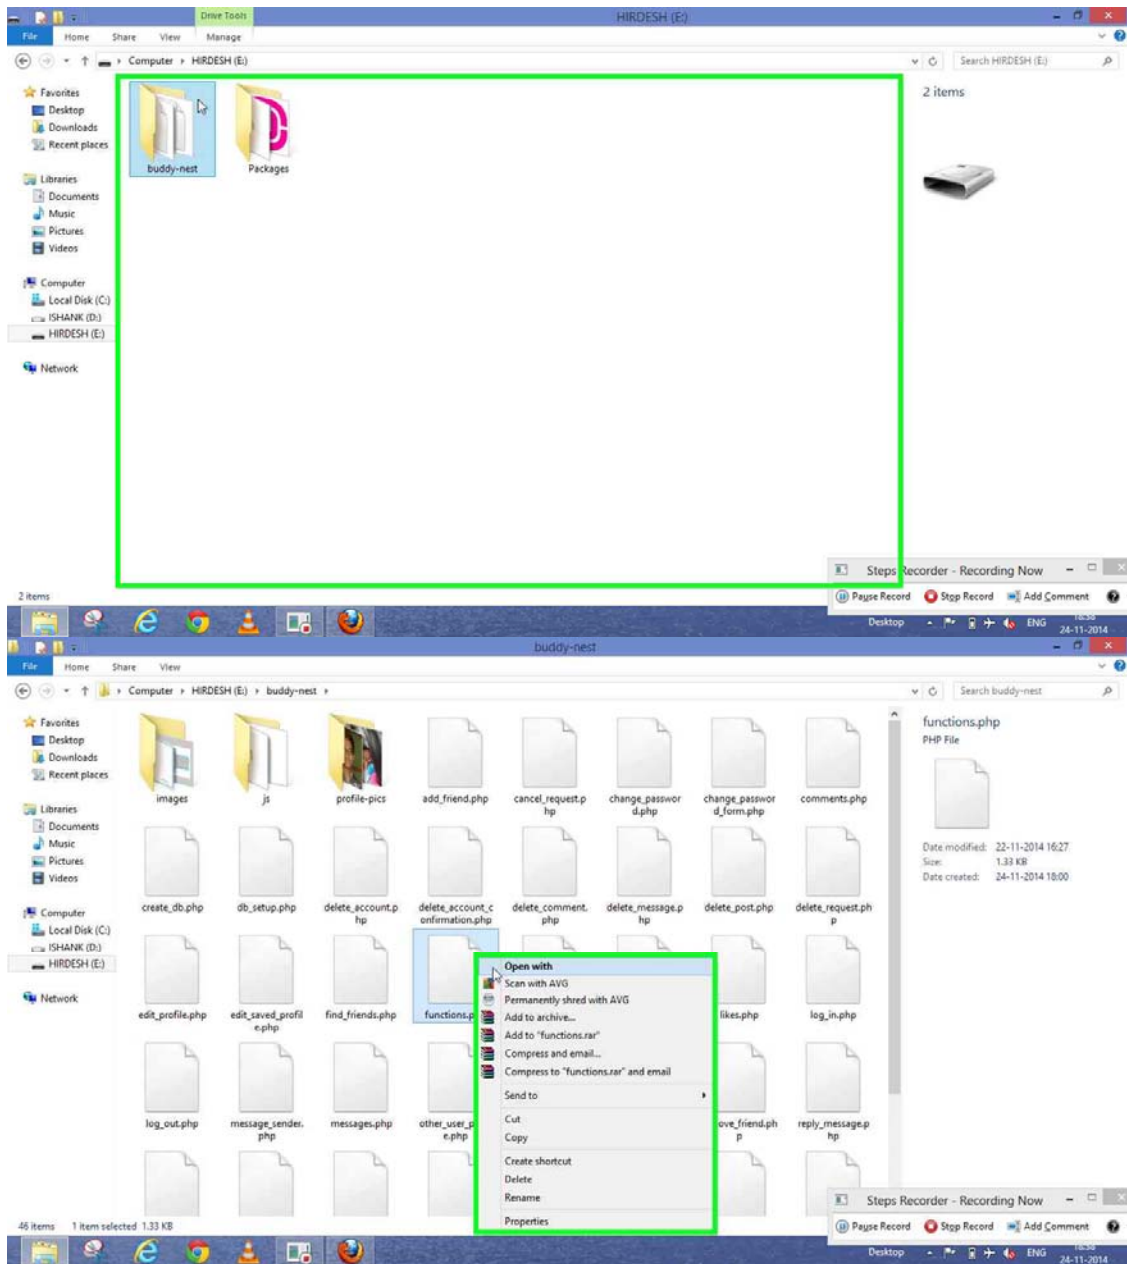

- Open Firefox and type 'localhost' in the address bar and press enter to open WAMP server localhost.

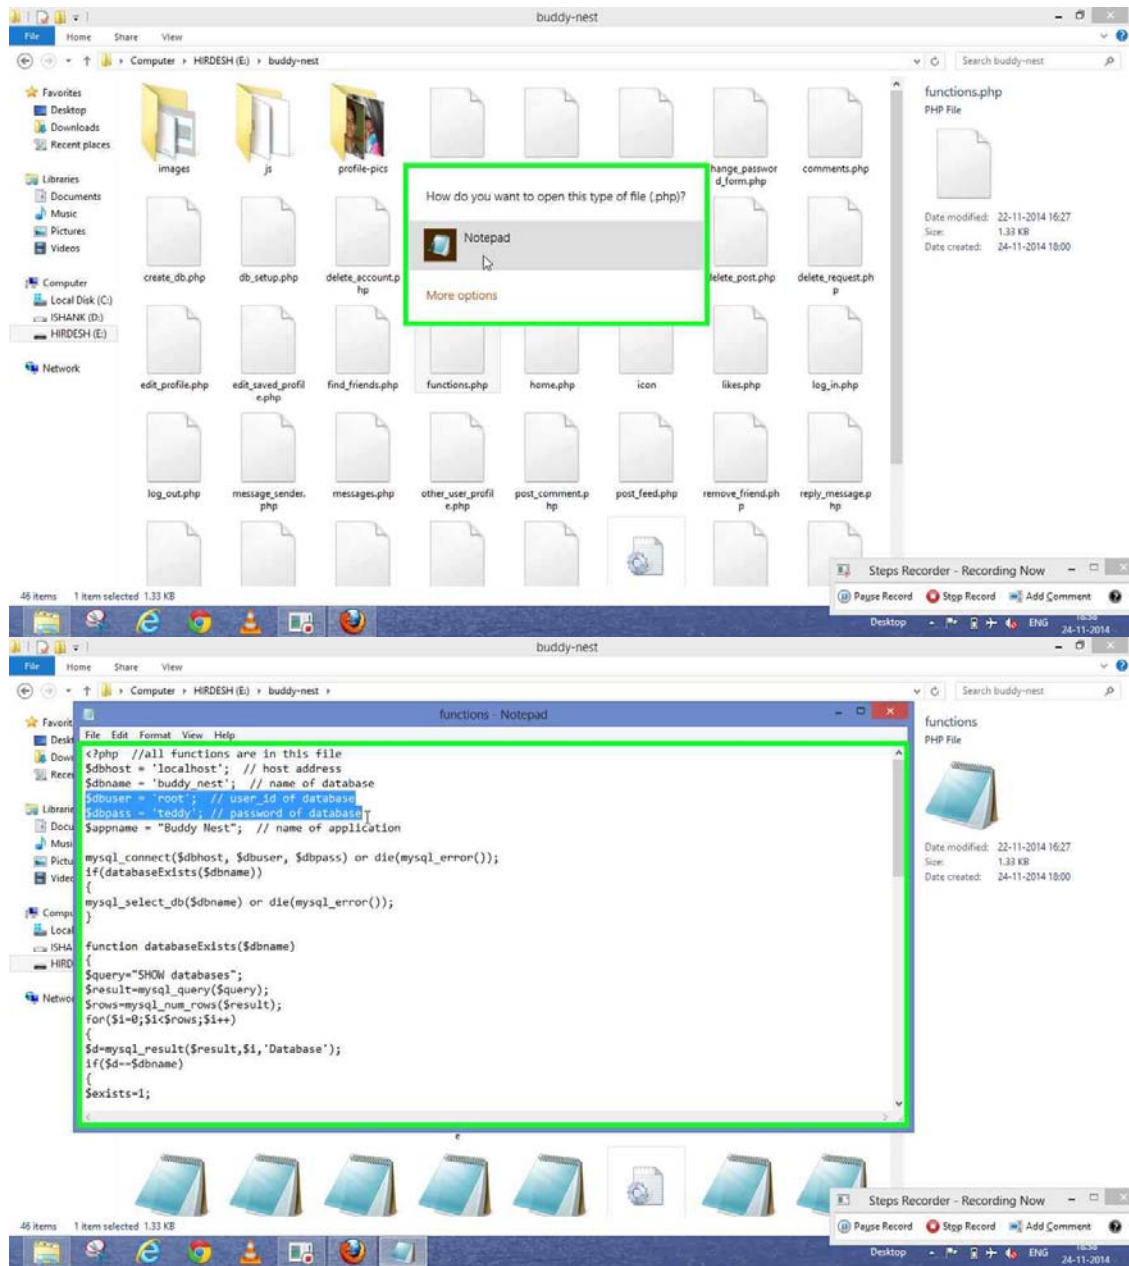

- Now click on 'phpmyadmin' to open phpMyAdmin.

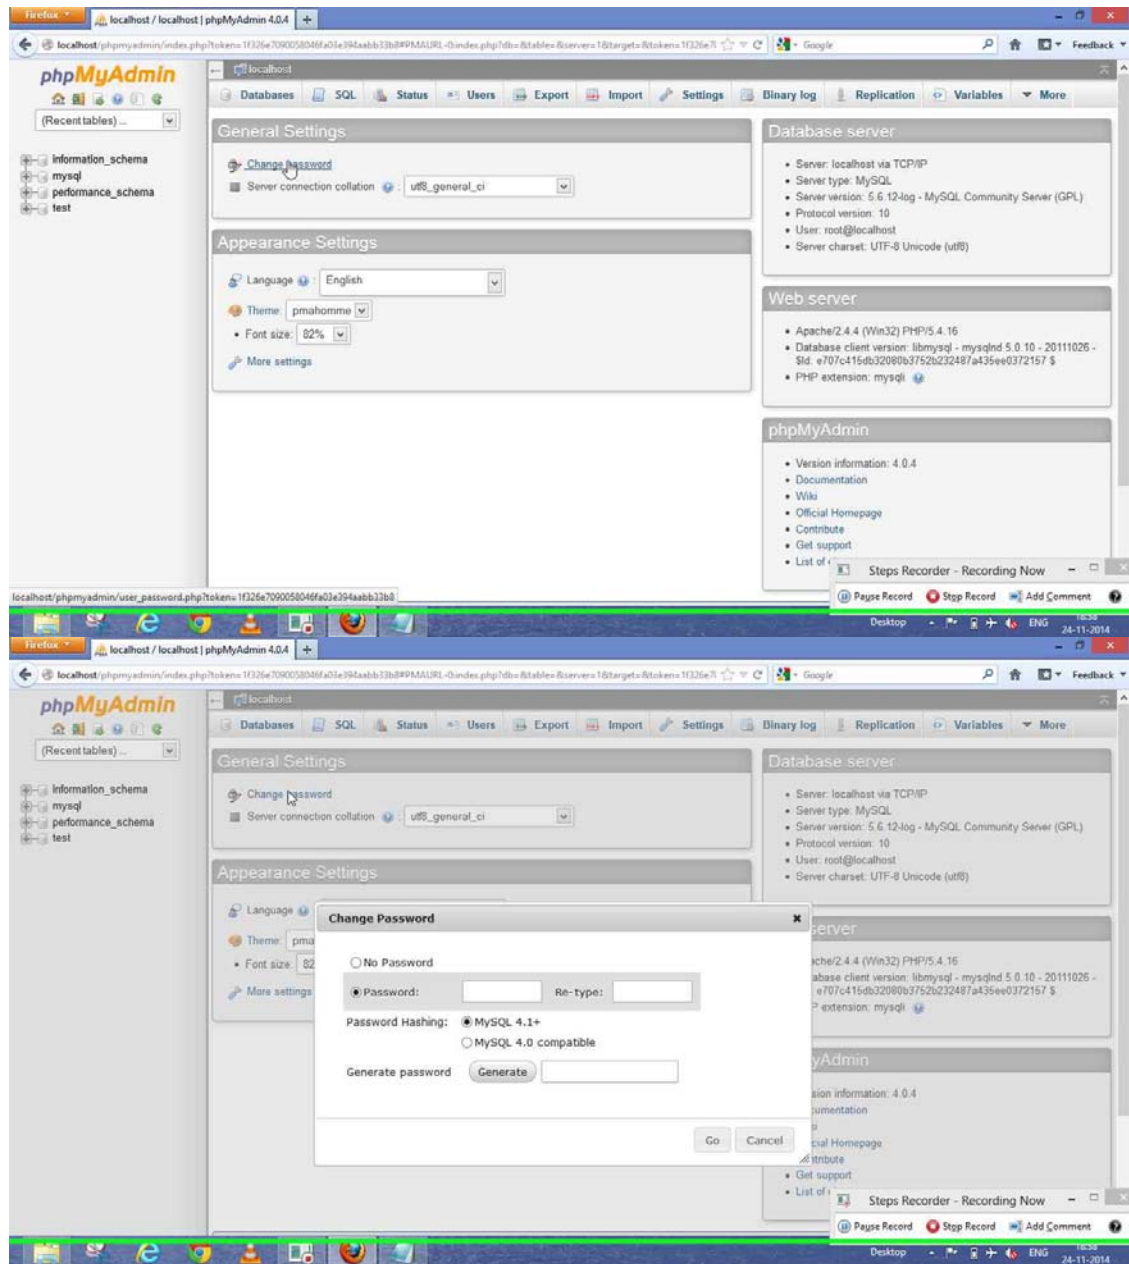

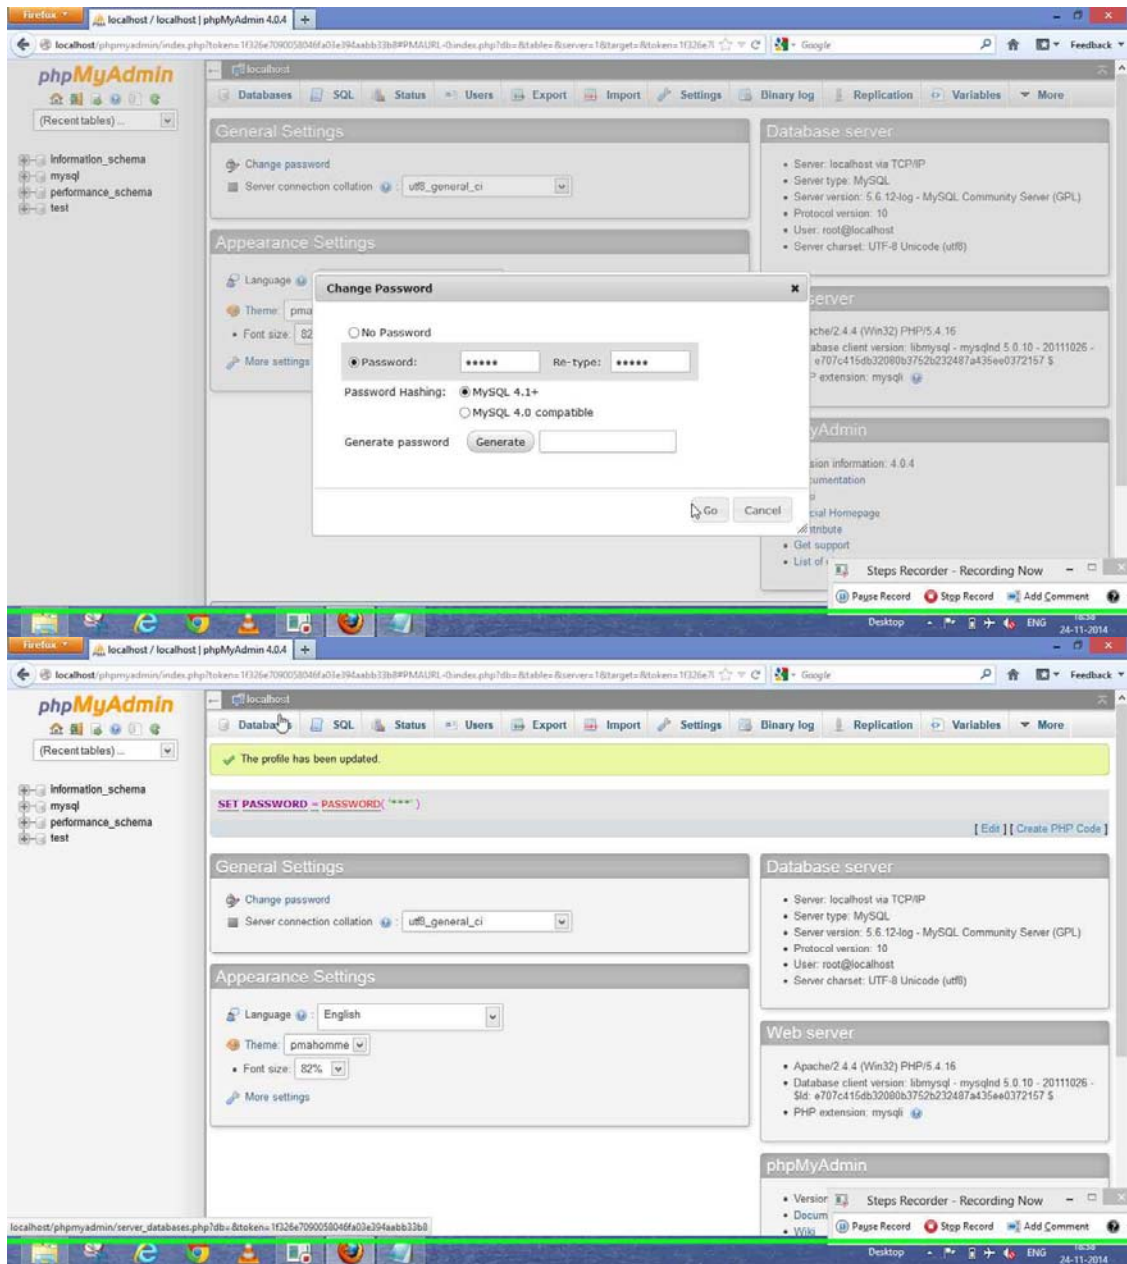

- Now minimize this window and open 'buddy-nest' in the disk directory and open a file named 'functions.php'.

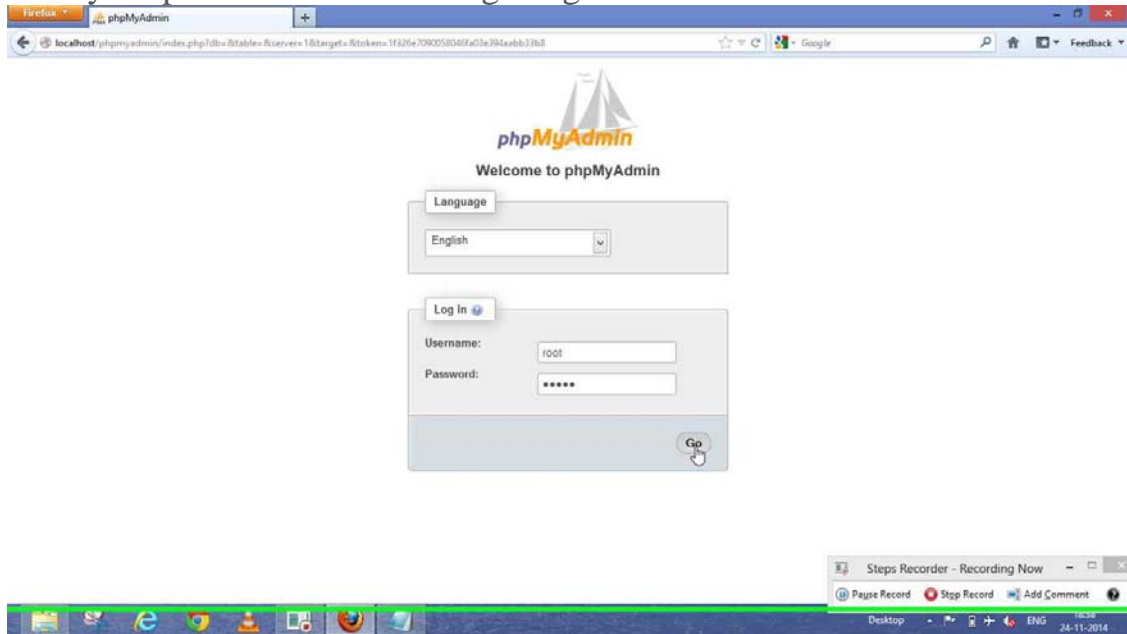

- Here database user and database password is written which you have to enter into the phpMyAdmin panel.

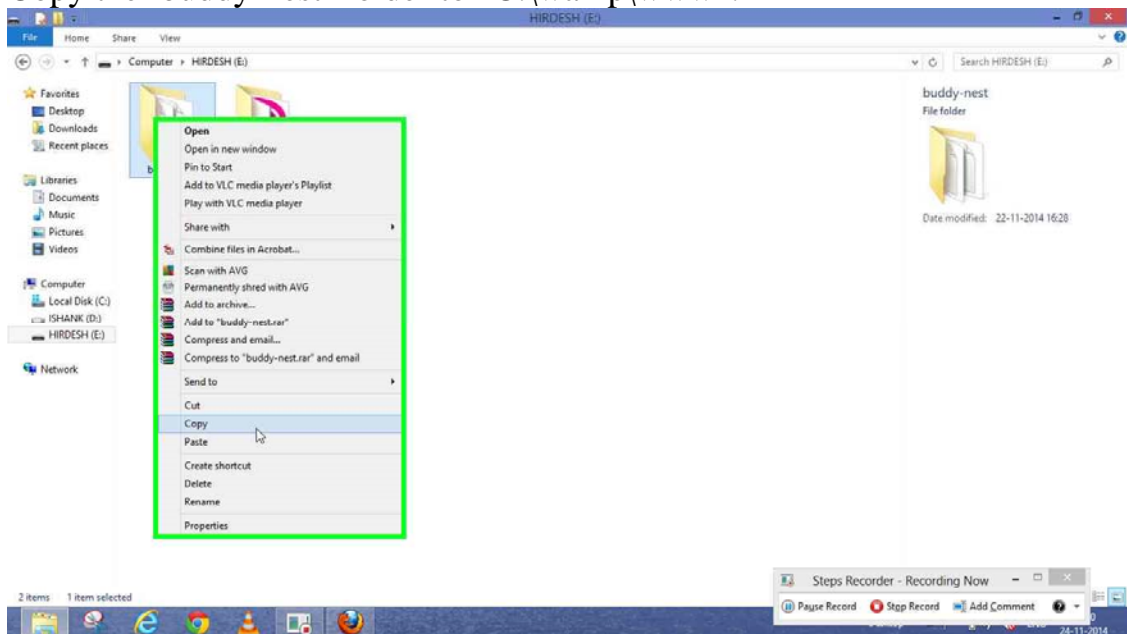

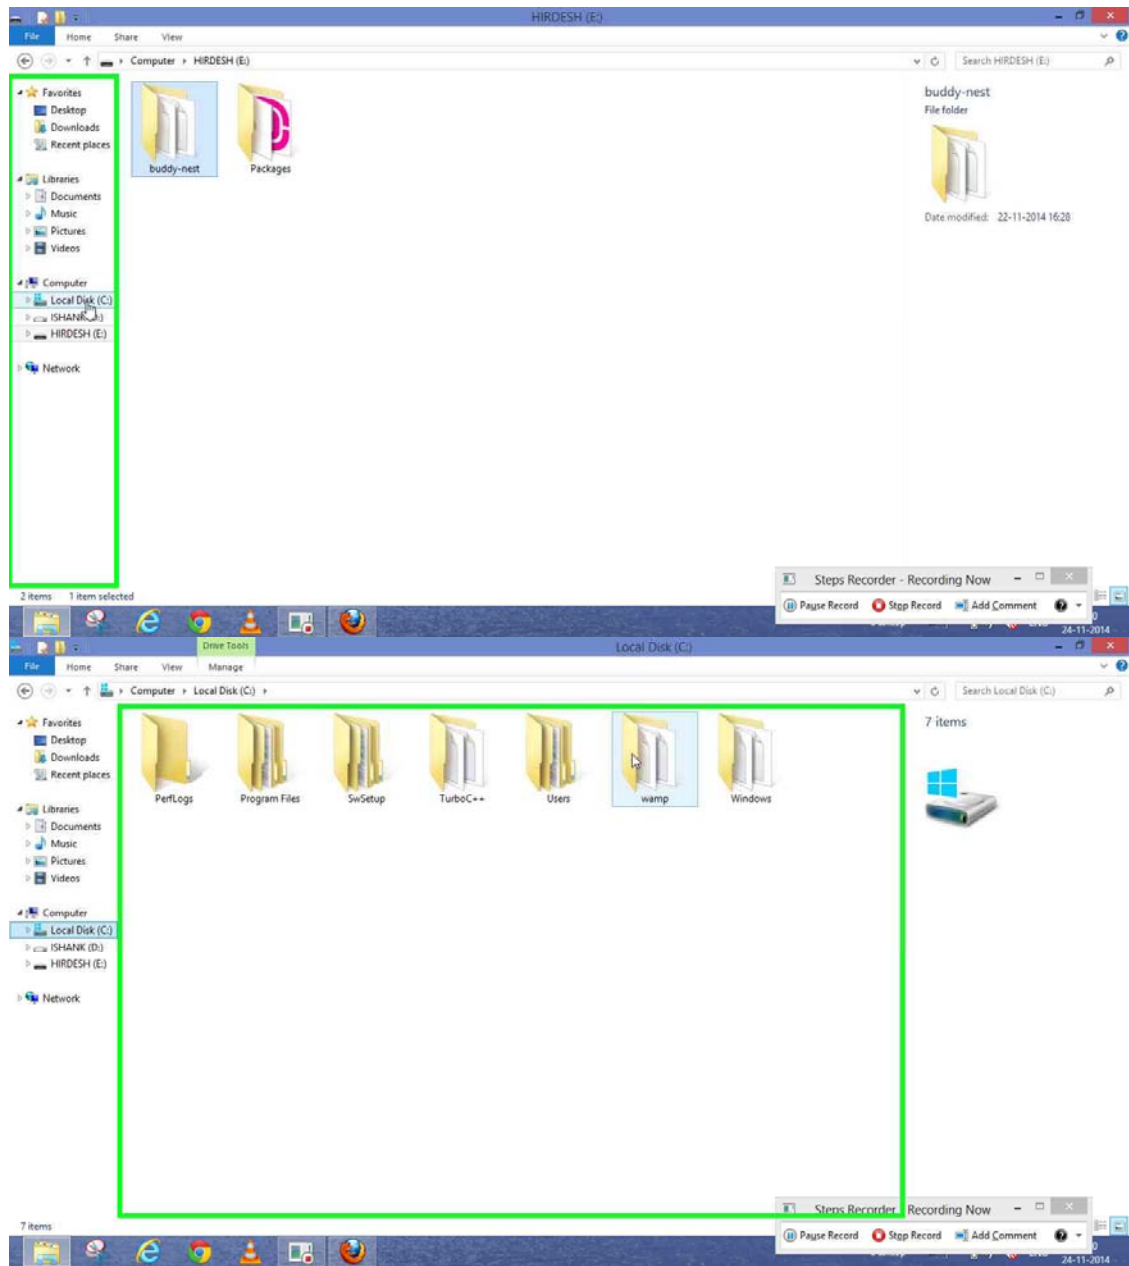

- Now your password is set and log in again.

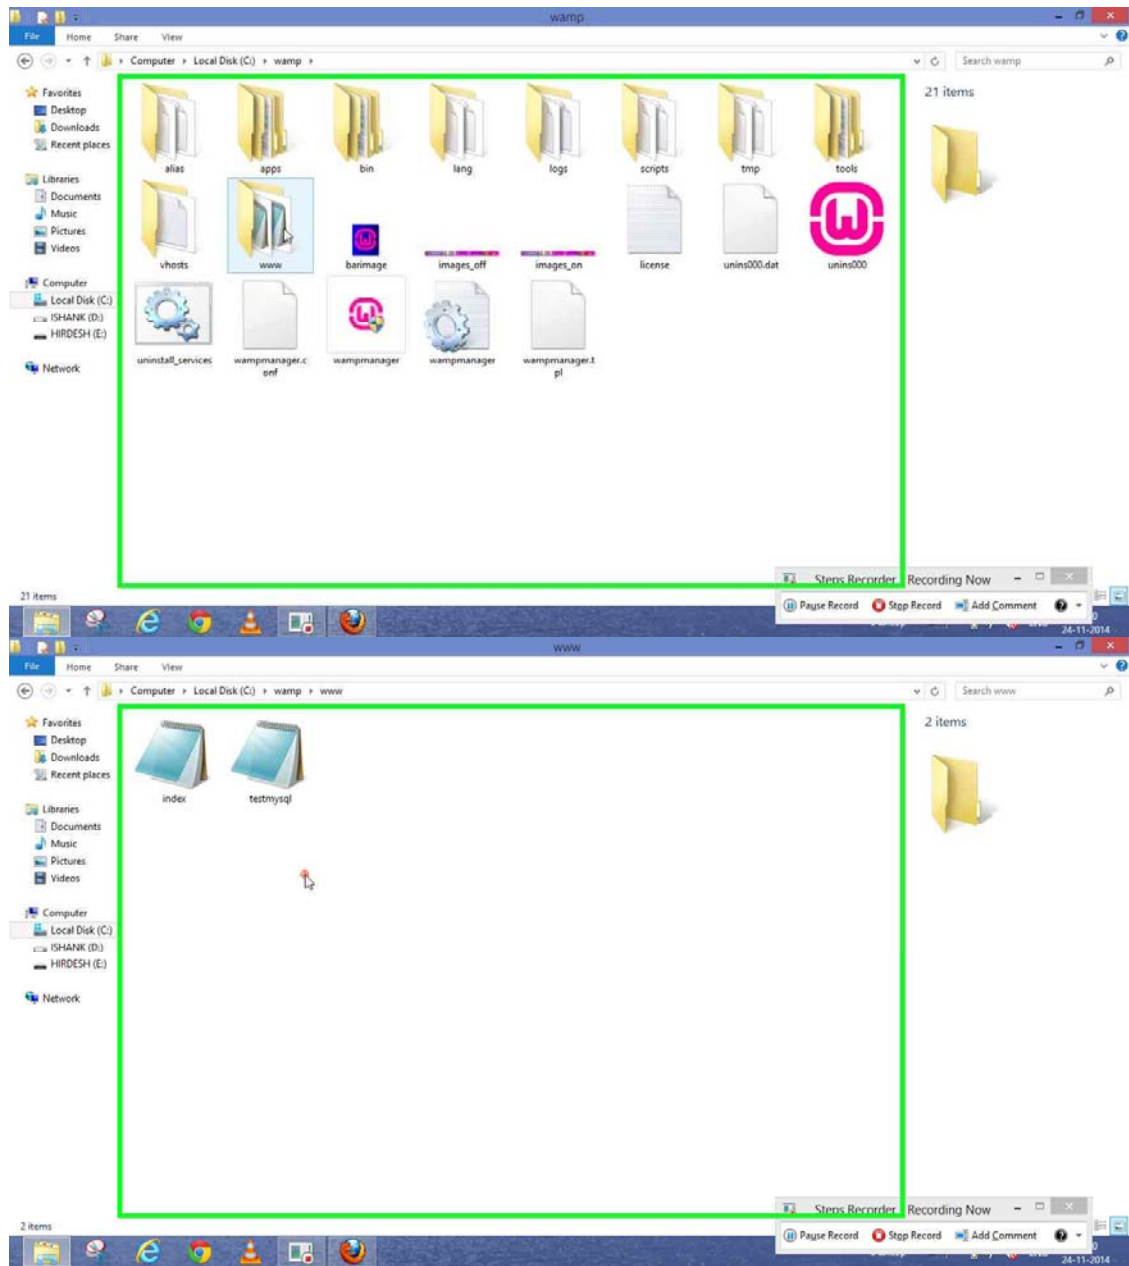

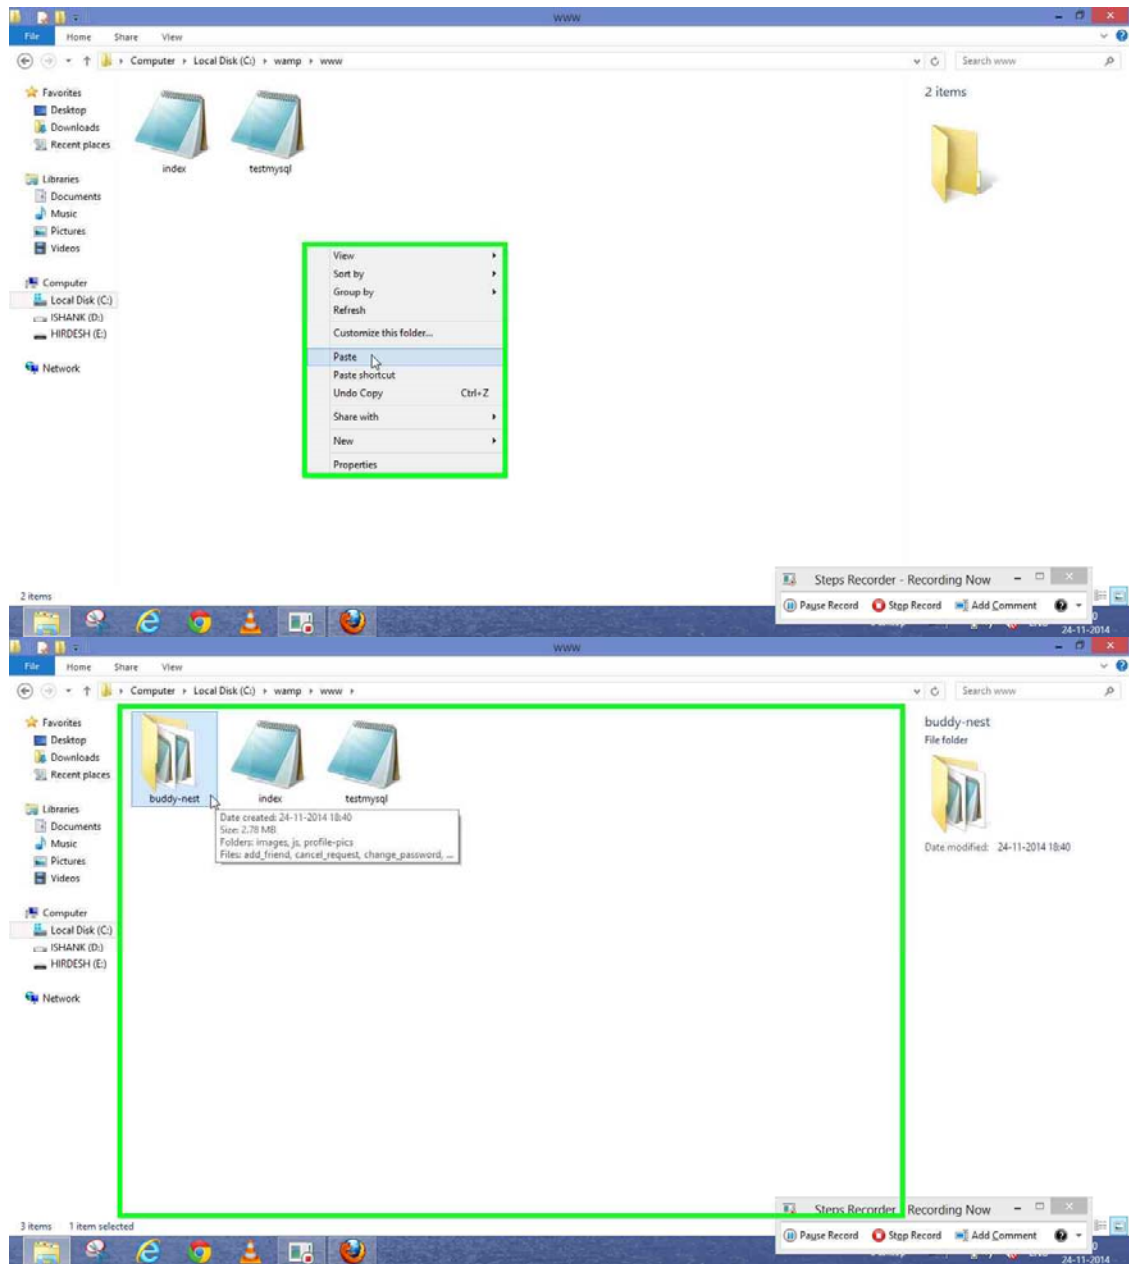

COPYING BUDDY NEST

- Copy the 'buddy-nest' folder to "C:\wamp\www".

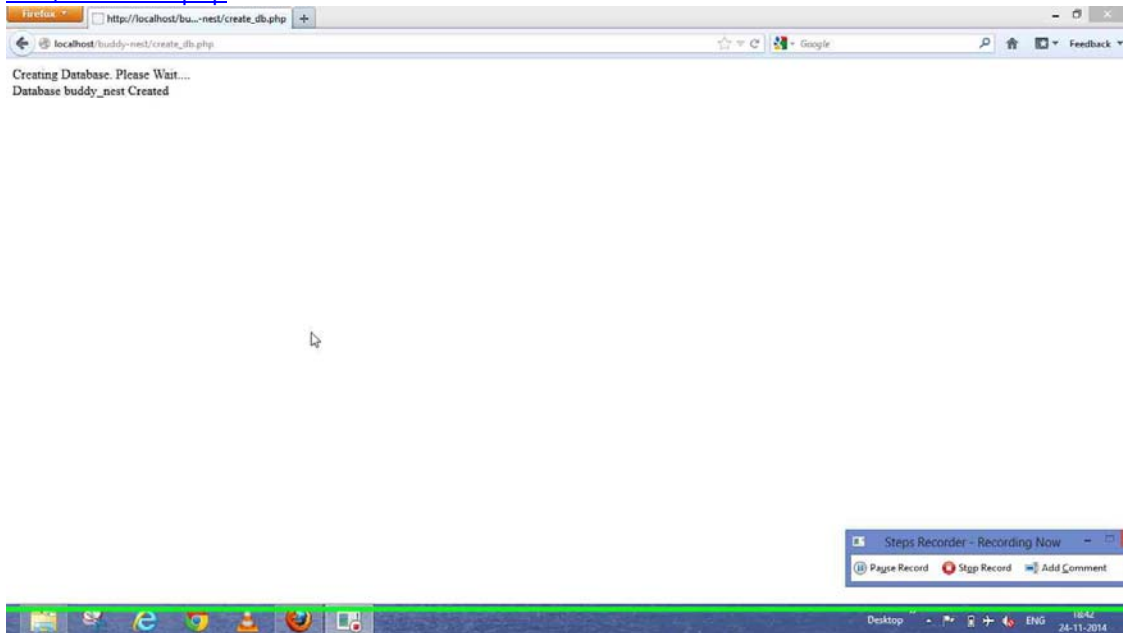

DATABASE

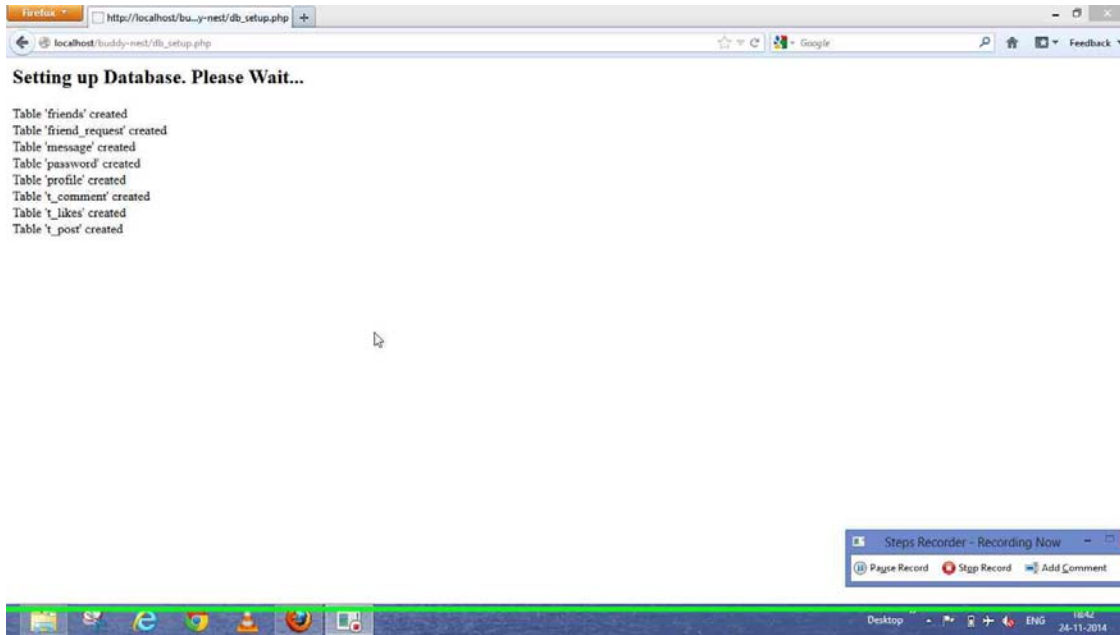

CREATING THE DATABASE

- Open Firefox and enter this address in the address bar http://localhost/buddy-nest/create_db.php

SETTING UP THE DATABASE

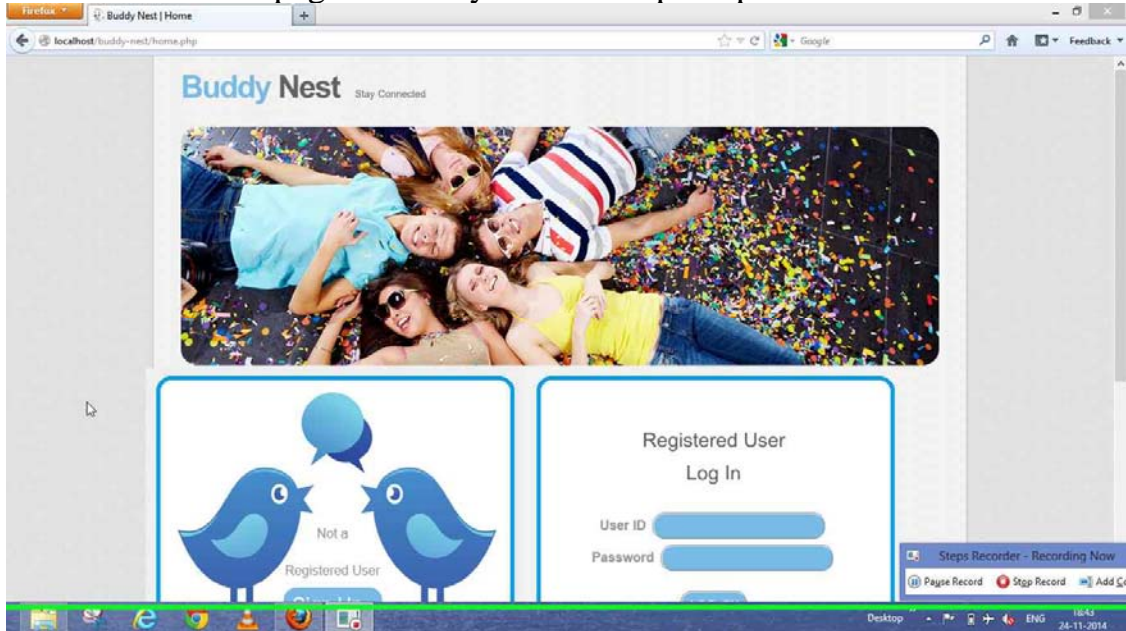

- Now enter http://localhost/buddy-nest/db_setup.php in the address bar of the Firefox.

- Now all the tables of the database are created.

STARTING THE PROJECT

- Now enter <http://localhost/buddy-nest/home.php> in the address bar of the Firefox and then the homepage of Buddy Nest will open up.

- Now you can start making your profile and view our project.
